EXPERIENCE

BuildASoil

Full Stack Developer *May 2022 - June 2023*

- Design, develop, and maintain software applications using TypeScript, React, and Python.
- Collaborate with stakeholders to provide technical expertise and support throughout the software development lifecycle.
- Continuously improve software development practices and identify opportunities for automation and process optimization.
- Write clean, efficient, and well documented code following standards and best practices.
- Integrate software components and third-party APIs to deliver seamless functionality.
- Participate in code reviews to ensure code quality and adherence to coding standards

Doral Arrowwood

Golf Course Management *August 2015 - December 2020*

- Collaborated with local golf associations, vendors, and sponsors to foster positive relationships and secure partnerships.
- Developed and implemented strategies to attract new golfers and increase revenue through memberships, tournaments, and events.
- Oversaw daily operations of the golf course, ensuring smooth functioning and exceptional customer service.
- Maintained and improved course conditions by coordinating with groundskeeping staff, ensuring proper irrigation, mowing, and landscaping.
